

Appendix D. Requirements Identification Table

The table below shows the mapping between the old requirements numbers used in the preliminary draft of the SDPS Level 4 requirements, and the new numbers used in this document. The old numbers are also used in the requirements Issues Matrix that summarizes the issues identified by the SDPS Design Working Group. For example, a reference to requirement WKBCH-00770 in the Issues Matrix corresponds to requirement S-CLS-10770.
